EDUCATION

BS Software Engineering

COMSATS University Islamabad,
Vehari Campus

2022 — 2026

TECHNICAL SKILLS

— React, Angular, TypeScript

— Tailwind, MUI, Three.js

— Node.js, Express

— Firebase, Supabase

— Flutter, Riverpod, Hive

— Electron, SQLite

— Git & GitHub, Figma

LANGUAGES

— English — Professional

— Urdu — Native

Profile

Final-year Software Engineering student building production-grade web, mobile, and desktop applications across React, Flutter, and Electron. Comfortable owning a project end to end — from architecture and database design to a shipped, working product. Experienced with real-time data sync (Firebase/Supabase), encrypted local storage, and cross-platform UI systems.

SELECTED PROJECTS

Flickcom ISP Admin Portal

2025

React 18 · Vite · Firebase · Tailwind · MUI · Recharts

- Built a role-based admin portal with real-time Firebase RTDB sync for ISP operations.
- Designed a KYC approval workflow and a grandfather pricing engine for legacy customers.
- Integrated JazzCash & EasyPaisa billing with dual FCM push notifications on payment.

Secure Online Election Management System

2025

React 18 · Node.js · Supabase · Three.js · Framer Motion

- Developed an 85+ file platform with blockchain-style, tamper-evident audit logging.
- Implemented reCAPTCHA v3 fraud prevention and full English/Urdu i18n support.
- Added automatic session idle timeout for election security.

GameVault

2024

Flutter · AES-256-CBC · Pointycastle · flutter_secure_storage

- Designed a playable tap-match game that conceals an AES-256-CBC encrypted file vault.
- Built a secret in-game trigger sequence to unlock the vault with zero visual trace.
- Delivered all 7 UI screens and the full client-side security pipeline.

KametiPro — Committee Management System

2024 — 2025

Angular 17 · Node.js · Express · Supabase · Tailwind

- Architected a 12-phase platform digitizing traditional rotating-savings committees.
- Designed a transparent digital ledger and automated payout scheduling per member.

ADDITIONAL PROJECT EXPERIENCE

Built and shipped 18+ additional applications across mobile (Flutter), desktop (Electron + React), and web (React/Supabase) — including a Smart Finance Tracker, AI English Assistant, College Management System, Fitness & Diet Tracker, Tailor Management App, and a Mini Store e-commerce platform. Full case studies available at the portfolio link below.

CORE COMPETENCIES

- Cross-platform development: Web (React/Angular), Mobile (Flutter), Desktop (Electron).
- Real-time architecture with Firebase RTDB/Firestore and Supabase.
- State management: Zustand, Riverpod, Context API.
- Local-first data with Hive, SQLite, and AES-256 encryption pipelines.
- UI motion and design systems with Framer Motion and Tailwind CSS.
